Scajaquada Creek Project: Introduction to Water Quality Indicators

1. Why do you think that oxygen might be important to the health of a body of water?

2. Try to think of one ways that oxygen could find its way into a body of water. _____

3. Have you ever heard of the **pH scale**? If so, where have you heard of it and what do you remember about it? _____

4. What are three possible things that could affect the clarity of a body of water? _____

5. Can you think of a way that you could evaluate the clarity of the water? How might you do it?

6. What do you think it means when we say that something is a **good conductor** of electricity? _____
