

Name: _____

Date: _____

River Characterization Study: Scajaquada Creek

Homework #3: Follow Up

1. Did your actual observations of the land uses at and around your site correspond to what you thought you would see?

2. What things did correspond with your original predictions? _____

3. What things did not correspond to your original predictions? _____

4. If you were going to discuss your observations from today's field work with someone else, what two points would you share?

5. Pick three main land uses that you identified. How do you think each might affect the water quality in the creek?

6. What did you observe about the possible sources of water inflow to your section of the creek?

7. How do you think each of these might affect the water quality in the creek?
