Introduction to Systems

For homework tonight, I would like you to think about a word that most of you are probably familiar with. That word is **system**.

1. First, use the space provided to, **list** and **describe** 4 specific examples of systems that you are familiar with.

1. _____

2. _____

3. _____

4. _____

2. Now use the space below to brainstorm and write down 4 characteristics that the systems you identified in the space above have in common.
